

## Do You Have Better Things to do Than Worry About UST Compliance?

**We bet you do.** That is why we are proud to offer a storage tank compliance management program that is unsurpassed in the industry. Owners and operators are able to save money, improve compliance, manage risk, and re-focus on their core business with Compliance PLUS. This state-of-the-art database gives our team of professionals the edge in managing the tasks needed to get your tanks in compliance - and keep them there.

### **Experience Counts.**

Our compliance experts are among the most experienced in the nation. With offices in seven states and experience throughout the country, we have an extraordinary understanding of the compliance requirements in your market. And should an environmental incident ever occur, we have the internal and external resources to respond quickly and effectively.

### **The Most Frequently Requested Compliance Services in One Convenient, Affordable Package.**

The Compliance PLUS Standard Program Consists of:

- > Compliance PLUS Database
- > Equipment Profile
- > Compliance Test Management
- > Permitting Management
- > Notice of Violation Resolution
- > Regulatory Assistance
- > Periodic Compliance Reports

Most importantly, Compliance PLUS is guaranteed. If a violation results in a fine and we are responsible for the issue, we will pay the fine.

### **Why Compliance PLUS Storage Tank Management?**

You will see dramatic savings - you will be able to put an end to fines and penalties for past due items and inspection violations. Your station will no longer be disrupted by unnecessary shutdowns as a result of violations. You will also ensure your cleanup fund eligibility, as most state fund programs require compliance. Additionally, your insurance company may extend a discount to you for being a program participant.

Compliance PLUS programs can be designed to meet the unique needs of each client, and permitting and testing management can be expanded to include other aspects of facility management activities. You may choose among the Standard Compliance PLUS Program and many additional assistance services. All program components are available a-la-carte. And if you only need help once in awhile, we offer ad-hoc consulting and project management.

### **Focus**

Compliance PLUS programs allow the owners' and operators' resources to focus on organizational priorities and profitable initiatives. Employees can concentrate on core tasks - the accountant can stop trying to remember when a test or permit is due, and the sales manager can stop trying to remember where important storage tank compliance documents are filed.
